Indoor & Outdoor
Wireless Lighting Control System

Lightcloud®

Professional indoor and outdoor lighting controls, automation, and energy management made simple.

Lightcloud® is designed to be installed by any electrician and managed by anyone that can use a cellphone; no expertise is needed! It's really that simple, but you'll be amazed how powerful the system is. Control a single fixture or an entire campus securely from your phone. Every Lightcloud system comes with these complimentary services:

Concierge Service

- Unlimited tech/user support and commissioning
- Unlimited use of RAB lighting design services
- Utility rebate assistance
- User management

Energy Monitoring

- Measures, tracks and reports real & estimated power usage over time
- Identify and implement energy curtailing methods
- Demand response mode for additional savings

Maintenance

- 10-year full hardware warranty with 100% repair or replacement coverage for all properly installed devices. For details, see lightcloud.com/legal
- Seamless over-the-air upgrades
- Cloud updates for new features

Access & Security

- Gateway uses private, encrypted 3G connection (included with Lightcloud Gateway)
- Lightcloud devices communicate over secure, wireless mesh network
- No access to corporate network required
- Control your lights from your mobile device, tablet, computer, or dimmer switches

More Features

BACnet Integration	Demand Response	Manual Controls
Control Remotely	Dimming	Occupancy & Vacancy
Daylight Sensing	Indoors & Outdoors	Scheduling

Why Lightcloud?

Centralized Scheduling

Adjust schedules easily with the Lightcloud App, or have us do it for free. Schedules can be based on fixed times or on sunrise/sunset times, with automatic adjustment for daylight savings.

Energy Savings

Save money and reduce your footprint with Lightcloud automation. Install the controllers and watch your energy bill drop up to 68% with the first DLC-listed lighting control system.

No Expertise Needed

If you can wire a fixture, you can wire Lightcloud. Any electrician can install the system, with no training. Controls are completely intuitive.

Remote Control

Make changes on your phone, tablet, or computer without installing any software.

Any Application

Airports & Aviation	Automotive
Community Centers	Hospitals & Healthcare
Hotels	Industrial & Manufacturing
Offices	
Parking & Storage	Residential
Restaurants	Retail
Schools & Universities	Spirituality & Worship
Sports & Recreation
