### 3.0 LM-79 Measurement and Test Results

#### 3.1 Integrating Sphere Test

| Model No.           | PLT-15.5-H-830-BYP | Sample ID.                | A1 |
|---------------------|--------------------|---------------------------|----|
| Opreate time (Min.) | 15                 | Stabilization time (Min.) | 15 |
| Temperature (°C)    | 25.3               | Humidity %                | 55 |

#### **Test Method**

The samples were tested according to the IES LM-79-2008.

Photometric paramters were measured using an integrating sphere, a spectroradiometer and software. The ambient temperature condition inside the sphere was maintained at 25° C ± 1° C.

The sample measurements were made using a spectroradiometer connected by a fiber optic cable and detector through the detector port of the integrating sphere.

The voltage of an AC power supply (RMS voltage) or DC power supply (instantaneous voltage) applied to the device under test shall be regulated to within ±0.2 percent under load.

The sample was measured using  $4\pi$  geometry and operated at rated voltage and was stabilized before measurement. Chromaticity coordinates, correlated color temperature and color rendering index were calculated from the spectral radiant flux measurements taken at 1 nm intervals over the range of 380 to 780 nm.

#### **Test Conditions**

# 3.2 Integrating Sphere Test - Minimum CCT

#### 3.3 Goniophotometer Test

| Model No.           | PLT-15.5-<br>H-830-BYP | Sample ID.                | 0  |
|---------------------|------------------------|---------------------------|----|
| Opreate time (Min.) | 15                     | Stabilization time (Min.) | 15 |

#### **Test Method**

The samples were tested according to the IES LM-79-2008. Photometric paramters were measured using an integrating sphere, a spectroradiometer and software. The ambient temperature condition inside the sphere was maintained at 25° C + 1° C.

The sample measurements were made using a spectroradiometer connected by a fiber optic cable and detector through the detector port of the integrating sphere. The voltage of an AC power supply (RMS voltage) or DC power supply

(instantaneous voltage) applied to the device under test shall be regulated to within ± 0.2 percent under load.

The samples were operated at rated voltage and was stabilized before measurement. Luminous flux, luminaire efficacy, zonal lumen were calculated from the software taken at 0.5o vertical intervals and 10o horizontal intervals.

## 5.0 THD and PF Test

| Model No.     | PLT-15.5-H-830-BYP |      | Sample ID. | A1 |
|---------------|--------------------|------|------------|----|
| Temperature ( | $(\mathcal{C})$    | 25.3 | o/         | 49 |

#### **Test Method**

The samples were tested according to the ANSI C82.77:2002.

The total harmonic distortion shall be measured to the 40th order.

The ambient temperature condition was maintained at  $25^{\circ}$  C  $\pm$  1° C. The sample measurements were made using a digital power meter and power supply. The sample was operated at rated voltage and was stabilized before measurement. The total harmonic distortion were calculated.

#### **Test Results**

| Temperature (°C) | Voltage<br>(Vac) | Frequency<br>(Hz) | Current (A) | Power (W) | Power<br>Factor | THD    |
