AL22

**ADJUSTABLE OPTICS**

FIELD ADJ.

contractorplus

The new era of adjustable-optics lighting is here.
Meet the versatile AL22 area light.

The area light that knows how to flex.

The AL22 revolutionizes area lighting with adjustable optics that let you change beam patterns with the flick of a switch. Whether you need Type III, IV, or V distribution, this smart approach means you can fine-tune your distribution in seconds!

Type III

Type IV

Type V

Two sizes, endless possibilities.

Available in two sizes with 3 selectable wattages and CCTs, the AL22 lets you fine-tune your lighting to match exactly what your site needs. It's also got an adjustable, universal pole mount that's suited for both round and square poles.

CCT
3000K
4000K
5000K

150, 100, 80W
300, 240, 200W

Smart, future-ready design.
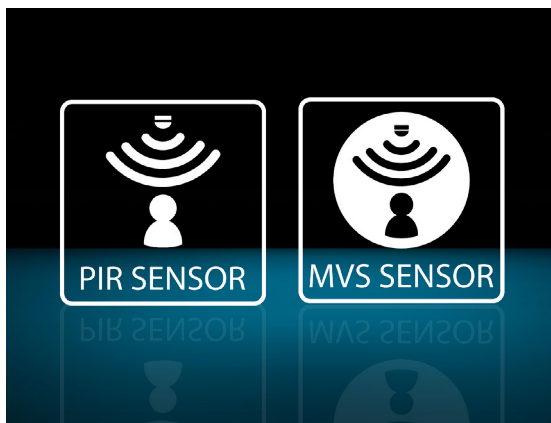

The AL22 comes with a standard twistlock photocell but it's also built with an integrated 7-pin receptacle and a sensor port, so you can easily add our standard or LCB-enabled MVS and PIR sensors in the field. That means you can upgrade your lighting intelligence whenever you're ready, without rewiring.

PIR SENSOR   MVS SENSOR

Mounting accessories for site-wide use.

With slipfitter and wall mount accessories available, the AL22 can help you achieve a continuous look throughout an entire site. Non-adjustable pole mounts are also available for compliance needs.
