ARC

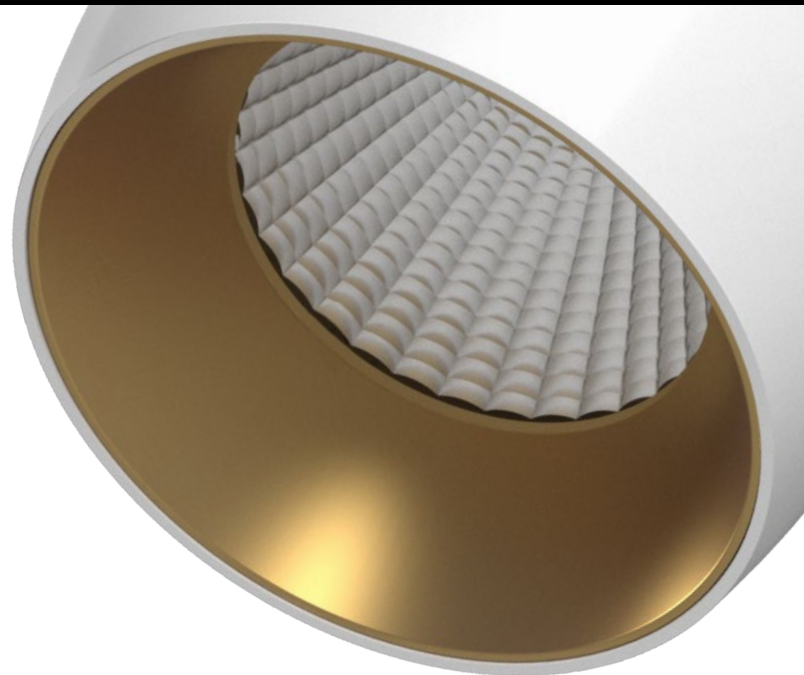

Decorative track lighting with a heart of gold.

ARC — built for spaces that demand more.

The gold standard.

All ARC models include a beautiful gold reflector, no matter which finish you choose. It's a signature detail that gives retail displays, hospitality spaces, and high-end residential projects a level of finish that standard track heads simply don't deliver.

FEATURE PAGE

*Only semi-recessed mount is damp rated.

RAB's warranty is subject to all terms and conditions found at rablighting.com/warranty

Mounting flexibility.

Track mount is the starting point, but the ARC includes five different mounting options: track, surface, semi-recessed, track pendant, and pendant. One fixture family covers a lot of ground, so specifiers can keep a consistent look across a project without sourcing multiple products.

Aim it exactly where you need it.

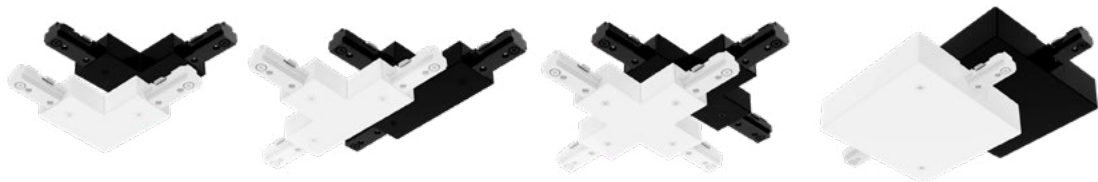

The ARC head tilts up to 40° and rotates a full 360°, so installers can hit their target. And with 36° optics, the beam is focused and deliberate — ideal for accent lighting, merchandise displays, or artwork

Light that does the space justice.

At 3000K with 90 CRI, the ARC produces warm, color-accurate light that flatters a space. For retail and hospitality especially, that combination of warmth and color rendering makes a real difference in how merchandise and interiors appear.

Complete design solutions.

ARC is fully compatible with our track system components, which include 3 track lengths in both colors, various joiner configurations, power feeds, and current limiters.
