C-WALL

High performance meets Earth-friendly design.

Meet the sustainable C-WALL.

Innovation meets sustainability.

The C-WALL is the next evolution in wall packs, delivering the versatility you need with the sustainability customers demand...all at an incredible price point. With a carbon footprint over 50% lower than comparable wall packs, the C-WALL's light, low-profile design uses recycled aluminum and a biocomposite resin lens manufactured with natural materials like sugarcane.

Field-adjustable for ultimate flexibility.

Available in three sizes to fit any application, each fixture allows you to fine-tune your lighting environment without stocking multiple SKUs. And an integrated photocell automatically controls operation from dusk to dawn.

Designed for real-world performance.

C-WALL combines sleek, modern design with practical functionality that makes it a breeze to install. It includes three conduit entry points (side and back) and the backplate has a drill template that matches most standard junction boxes, but unlike traditional wall packs, its hinged face allows for easy wiring access and requires only one single set screw.

Minimizes glare while maximizing visibility.

The C-WALL's unique design places the LEDs at the top of the fixture rather than the back, so that they're pointed completely downward and not towards your eyes. The aluminum reflector is also angled to control the direction of light, putting it only where it needs to go.

Ordering Matrix

Product Family	Wattage	Color Temperature	Finish	Driver	Controls		
C-WALL							
S	32/25/17W	Blank	3000/4000/5000K CCT Adjustable	Blank	120-277V, 0-10V Dimming	Blank	Integrated On/Off Photocell
