

FIBERGLASS POLES

Corrosion-resistant,
lightweight, and easy to install.

Meet RAB's new fiberglass light poles.

Built for the long haul.

Our fiberglass poles are designed to withstand demanding environments year after year. The durable fiberglass construction resists dents and corrosion, and their advanced UV protection prevents fading, cracking, and fiber blooming.

Lightweight and insulated.

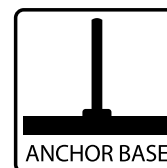

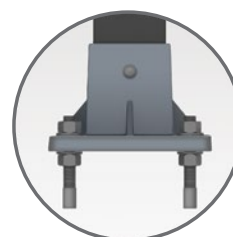

Fiberglass poles are much lighter than steel or aluminum, making them easier to handle and install, while their excellent weight-to-strength ratio ensures durability. And as a natural insulator, fiberglass reduces the risk of electrical discharge.

ANTI-
ROTATIONAL
FLANGE

DIRECT BURIAL

ANCHOR BASE

Installation made simple.

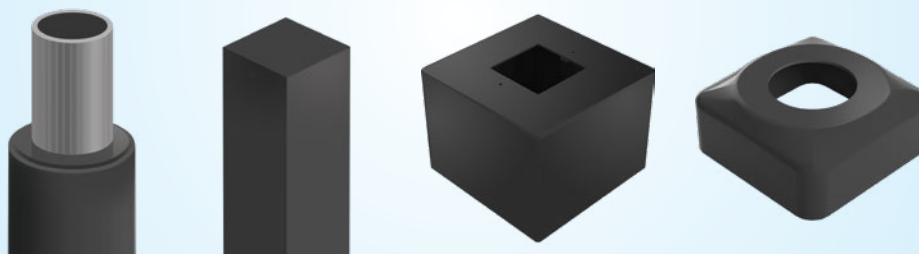

Direct burial models are available that eliminate anchor base ground preparation and the need for additional foundation materials. That translates to same-day installation with less labor and equipment!

Superior stability.

Bolt-down models are ideal for high-wind areas, heavier fixture loads, and to meet the specifications required by many municipalities and commercial codes.

Versatile design options.

Choose from round tapered or square 4x4 profiles and multiple mounting heights, for the flexibility to complement any application. Each pole is available with either a tenon or pre-drilled top for multiple mounting options and all drilled poles include a flat cap..

Ordering Matrices

COMPOSITE DIRECT BURY

Product Family	Shape	Burial Height	Height	Drilled/Welded Tenon
CD				
TR	Round Tapered	4	4 ft	15
S	4" Square	5	5 ft	20
				25
				15 ft*
				20 ft*
				25 ft**
				D Drilled
				WT Welded Tenon

* 4 Ft burial depth only applies to 15 ft and 20 ft poles.

** 5 Ft burial depth only applies to 25 ft poles.

Note: Poles ship with pole cap only.

COMPOSITE SQUARE WITH ANCHOR BASE
