

Take control of your plug loads with Lightcloud Blue!

Meet ASHRAE codes and drastically improve energy savings.

As easy as it gets.

Hardwired, high-capacity, and smart, the LCB Outlet makes it easy to get in control. The bottom socket is always on and the top one can be turned on/off either manually or remotely via the Lightcloud Blue app, a local dimmer, or an occupancy sensor.

Eliminate phantom loads and save energy.

Devices like computers, monitors, and printers draw power even when switched off. These so-called “phantom loads” can account for up to 25% of electrical consumption in commercial buildings. Managing your plug loads can cut overall energy use by around 10%* and the LCB Outlet makes that effortless.

**Plug Load Management System Field Study, USDoE, Feb 2019*

15A model ideal for standard office circuits.

20A model ideal for high-draw spaces.

FEATURE PAGE

Lightcloud

RAB's warranty is subject to all terms and conditions found at rablighting.com/warranty

Remote control is in your hands.

Now, you can easily manage plugged in devices throughout large facilities, all from one place. Completely cut off power to equipment that isn't being operated or has been left in standby mode; power down areas that are vacant after hours; change schedules as needed...all that control is in your hands.

CURRENT DEMAND
300 Watts

ENERGY USAGE

Know the data.

In addition to controlling your loads, the LCB Outlet also monitors energy usage (via the Lightcloud Blue app), providing real-time data on how much energy your devices are consuming. It also acts as a repeater for Lightcloud Blue networks, extending the signal so it can cover longer distances or be received on the other side of an obstruction.

Code compliance? Check.

ASHRAE 90.1 - 2010 and other energy codes* mandate the use of plug load and control, and the LCB Outlet is designed to meet them:

- Controlled receptacles managed with schedules, timers or sensors...check!
- Controlled receptacles that are permanently marked for differentiation...check!
- Outlets in dwellings that are tamper resistant...check!

**Compliant with ASHRAE 90.1 - 2010, California Title 24 and NEC Article 406.11*

Ordering Matrix

Family	Load Switching Capacity	Voltage	Finish	Controls
OUTLET	Blank 15	Blank	Blank	/LCB
	20A, 2400W 15A, 1800W	125V	Matte White	Lightcloud Blue
