

The PARK34 ultra-economy garage light.
Compact, innovative, and built tough.

A profile as low as its price.

The PARK34 is nearly half the height of most competitors. That low-profile design helps prevent damaging encounters with SUVs and roof racks.

Ceiling mount plate
Pendant mount adapter

Mounting flexibility.

PARK34 accommodates surface mounting and its unique, removable adapter allows for both 1/2" and 3/4" NPT pendant mounting (by others).

Small but mighty.

PARK34 is built to withstand tough treatment in garages. Its polycarbonate construction is impact resistant, to make sure these fixtures stick around for the long haul.

Maintain control.

PARK34 is available with an optional, integrated PIR motion sensor which includes bi-level dimming, to ensure the fixture is on when it's needed and dimmed or off when it's not.

Brighter, safer lighting distribution.

Precision-engineered optics deliver over 10% uplight, eliminating the dark spots known as the "cave effect" and creating smooth, even light output.
