The versatile washdown.

Available in three lengths (2', 4' and 8') the SEAL is now field adjustable, with three selectable lumen outputs and CCTs on each model. That's 9 SKUs built into one!

Built tough.

The SEAL is designed with a durable polycarbonate housing and is IP66 rated for complete protection from dust and oil, and protection from powerful jets of water. It's also NSF rated, NEMA 4X rated, and UL 94-5VA classified for flammability control.

Lightcloud® Blue enabled.

Available with factory-installed Lightcloud Blue compatibility, for use with our wireless, Bluetooth mesh control system.

Mounting options galore.

The SEAL comes standard with two mounting options: V-Hooks for chain mounting and brackets for surface mounting. Accessories are available for 45° angles and junction boxes so they can go anywhere you need them to.
