

RAB®

VIBE

Hang it once, light it up all year.
The permanent VIBE eaves light.

The ladder comes out once.

VIBE mounts to your eaves and stays there, so the ladder only comes out once. Orange in October, red in February, team colors on game day, and tunable white every night in between — all from the same run of light.

Every lamp, every color.

Each lamp is individually controlled, giving you full RGBW color plus tunable white from 2200-6500K. Run a single color across the whole roofline, alternate every other lamp, or dial the entire string back to warm white once the holidays are over.

Control it from your phone.

Lightcloud Blue connectivity gives you wireless on/off control as well as dimming and color tuning, all from the app. Choose from seven built-in, customizable light shows, and do it all from the driveway or the couch.

Sized for the whole roofline.

The primary string runs 150 ft with 108 lamps and includes both the driver and the controller. 25-ft extension strings are available for a maximum run of 200 ft.

Ordering Matrix

Product Family	Length/Wattage	Driver	Color Temp
VBE	Blank	Blank	/RGB
	150 ft, 50W	120-277V	Lightcloud Blue, 16+ million colors
