

WFR17

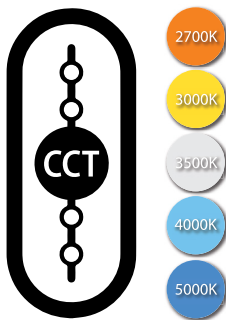

CCT-Selectable backlit wafers for tight budgets.

WFR17—economy without sacrifice.

Five color temperatures to choose from.

WFR17 models have field-selectable CCT, making changes as easy as the flick of a switch.

Remote driver.

Like all our other wafers, WFR17 is designed with an off-board driver that minimizes installation height and eliminates the need for a traditional recessed housing.

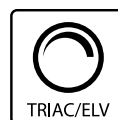

Beautiful inside and out.

Because the WFR17 family is wet rated, it's versatile enough to be installed in both indoor and outdoor applications.

High performance, competitive price.

The WFR17 is dimmable with most common 120V TRIAC/ELV dimmers*. All models are Title 20 & Title 24 compliant, and 90 CRI provides accurate color rendering, making them ideal for commercial applications where color is critical.
