High performance.

This family delivers a super-high efficacy of up to 169 lm/W and 80+ CRI. Its output is smooth and quiet and comes without the flickering or humming often found in ultra-economy lighting.

3-Way field adjustability.

All sizes of these wall packs have 3-way field adjustability: 3 selectable wattages, 3 selectable color temperatures, and an on/off photocell, giving you 18 SKUs in one wall pack. This is a game changer in the world of ultra-economy fixtures!

Traditional on the outside, cutting edge on the inside.

With a classic, prismatic glass design, the WP123 XFU comes in three sizes that cover the footprint of most outdated metal halide wall packs. With 8 different lumen packages to choose from, it's easy to find exactly what you need.
