BULLET FA

Small but mighty.

The BULLET floodlight, now with field adjustability.

Same great design with maximized flexibility.

The new evolution of our classic BULLET family delivers adjustable lighting that adapts to your needs. With selectable wattage options and CCTs you can fine-tune your lighting on-site without stocking multiple fixtures.

The BULLET family offers several configurations. Choose from single or dual-head designs with the standard BULLET and BULLET2X or add motion-sensing capability with SMSBULLET which feature 180° coverage and intelligent controls.

Engineered for durability in demanding environments, the BULLET has an IP65 rating that stands up to the elements year after year. Choose from four finishes which are all formulated for high-durability and long-lasting color.

The updated BULLET models feature a slimmer design that clocks in at half the weight of the original, which means fewer manufacturing materials, lower energy consumption to manufacture, and less fuel to transport...all with a higher, improved efficacy that saves you money!
