

# Less SKUs to manage.

LED panels are in constant demand for use in healthcare facilities, office spaces, and classrooms, where lighting preferences tend to vary from space to space. With field-adjustable wattage and color temperature, the new EZPAN reduces your SKU inventory which saves shelf space, reduces carrying costs, and increases product availability.

3500K

5000K

# Superior light output.

The EZPAN's polymethyl methacrylate (*PMMA*) light guide plate is built to outperform the competition with higher durability and better light transmission, while the improved UV stability of its lens prevents yellowing over time.

# SmartShift® circadian lighting.

EZPAN is available with SmartShift® circadian control (*Lightcloud Blue models*) which automatically tunes the color and intensity of indoor lights throughout the day, mimicking the sun's changing light as it rises and sets.

# Next-level energy savings.

With efficacies up to 155 lm/W, the high-efficacy models of the EZPAN exceed DLC Premium requirements for LED panels, drastically reducing energy costs for even quicker payback. Combine annual energy savings of up to 80% with the reduced maintenance cost that comes with installing LED, and EZPAN "HE" models can pay for themselves in less than a year!

## Luminaire level lighting control.

Models that have integrated Lightcloud Blue and occupancy sensors meet Luminaire Level Lighting Control (*LLLC*) requirements. These types of products can be wirelessly programmed and controlled using the Lightcloud Blue mobile app for features such as on/off, dimming, occupancy sensing, daylight harvesting, and so much more. Contact your local utility for details on their rebate programs for LLLC fixtures.

# Color your world.

All EZPAN sizes are available with tunable RGBW that lets you choose from 16+ million colors via the Lightcloud Blue app. Tunable white (2200-4000K) is also included.

### Mounting versatility.

Three EZPAN mounting accessory kits cover all possible application needs for surface, suspended, and recessed mounting.
