

RAB

One T8 to rule them all!

Everything you need: CCT adjustable and hybrid A/B.

1 SKU with 10 options.

RAB's CCT-adjustable hybrid A/B tubes take all of the guesswork out of projects. Easily select your color temperature and choose your installation type in the field. These tubes can be used as plug-and-play (Type A) or as direct wire (Type B) and can be wired either single or double-ended.

Hybrid

Can be used on existing ballasts or wire directly to line voltage

Damp

Rated for use in damp locations

Fluorescent replacement

Replace conventional fluorescent T8 linear tubes

Compatibility

Work with the most commonly used ballasts in commercial lighting applications. Refer to the Compatibility guide

Diffusion coating

Will maintain the same light quality over time and won't yellow, shrink, or wrinkle

Save energy and money

Approximately 40% more efficient than conventional T8 lamps

Mercury free

Environmentally friendly vs fluorescent technologies

Highly efficient

Lasts 1.6x longer than conventional fluorescent tubes

Dimmable

Dimmable down to 10% on compatible phase cut and 0-10V dimmers. Refer to Dimmer Compatibility List.

Maximized flexibility.

Field-adjustable CCT offers five color temperatures to choose from, giving you the flexibility and control you need in the field, both during and after installation.
