RAB

Scene selection has never been easier.

The Lightcloud Blue Keypad.

Lightcloud®

Wireless control at your fingertips.

Designed for 120-277V use with Lightcloud Blue-enabled lighting, the Keypad can control hundreds of lights *(neutral required)*.

120-277V

## Do it your own way.

Customizing button commands on the Keypad is a breeze. Set them to switch lights on/off, dim them up/down, change the CCT and/or RGB color, and create Scenes for maximum control. Each button can control up to 3 Areas.

TUNABLE RGBW

Switch the switch!

The Keypad includes interchangeable buttons that let you switch things up. The package includes an A/B/C/D set as well as a completely blank set that you can customize.
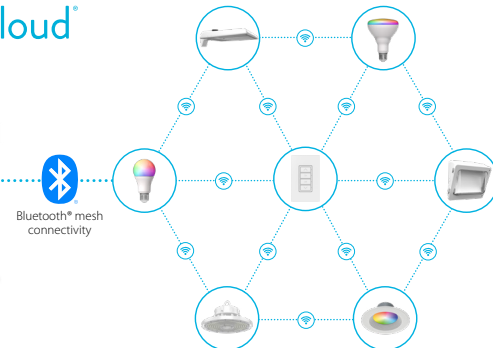

Plays well with others.

Lightcloud®

The Keypad is designed to integrate seamlessly into your existing Lightcloud Blue control system and work alongside its sensors, remotes, and other controls.
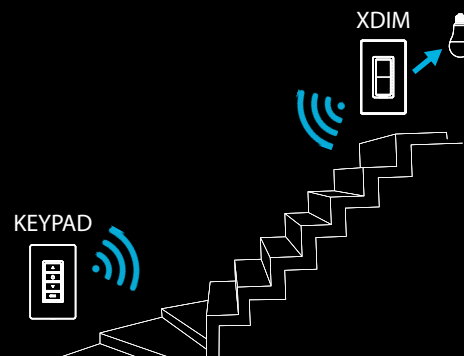

WORKS WITH alexa

works with Google Home

Bluetooth® mesh connectivity

3-way in a new way.

The Keypad can wirelessly communicate with any other Lightcloud Blue ZDIM, XDIM, or Remote. Easily mix and match the Keypad with any other Lightcloud Blue dimmers or remotes for added flexibility and control.
