

RAB®

LF34

Your landscape..in its best light.

The adaptive LF34 floodlight with precision glare control.

Two sizes for every application.

Available in small (8W) and large (33W) models, the LF34 delivers optimal illumination for any landscape feature. The small size provides up to 1000 lumens while the large delivers up to 4000 lumens, giving you the right output for all your 120V residential projects.

Perfecting your space.

Each LF34 features five field-adjustable CCTs, letting you match previously existing landscape lighting or create something totally new—all from a single SKU.

Precision glare control.

The innovative, rotating hood provides adjustable cutoff, letting you direct light exactly where you need it while controlling unwanted glare. Combined with a knuckle arm that locks every 2 degrees, you get complete, precision control over your lighting design.

Turtle-friendly lighting.

For coastal areas that need to minimize the risk of disruption to wildlife, LF34 is available in amber light models that emit long-wavelength light that is less distracting to sea turtles.
