

RAB

PIVOT

It's all in the art of the PIVOT.
Precision track lighting that never misses.

Light that moves with you.

The PIVOT's two-axis aiming system lets you rotate the fixture 315° and pivot the head up to 90°, so you can land the beam exactly where you need it without repositioning the fixture. It's the kind of precision that makes accent lighting look effortless.

The right light for every space.

PIVOT is available in 3 sizes to handle everything from a cozy reading nook to a high-ceiling gallery wall. All three sizes share the same sleek, articulating design, so mixing and matching on a project keeps the look consistent.

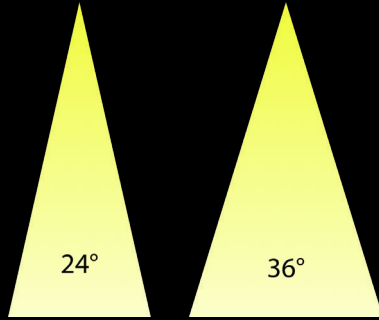

FEATURE PAGE

RAB's warranty is subject to all terms and conditions found at rablighting.com/warranty

Narrow or wide, you decide.

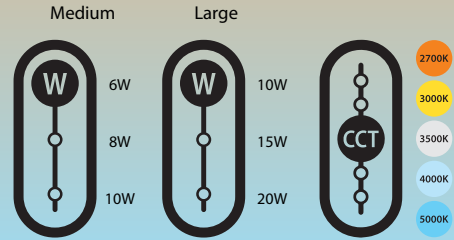

Choose between a narrow 24° spot or a wider 36° flood optic to suit the application, whether you're washing a wall or throwing a tight pool of light on a display.

Tune the light, match the moment.

The PIVOT includes field-adjustable wattage and CCT* so you can fine-tune your light from warmer residential vibes to bright, attention-getting light in art galleries.

**Small model includes 3 CCTs and static wattage. Medium and large include 3 wattages and 5 CCTs.*

Install it three ways.

PIVOT ships ready for standard single-circuit track, and with the right accessory kit it converts to a surface mount or pendant in minutes. Available for all three sizes, these accessories make sure one SKU can adapt to all your applications.

Track Mount

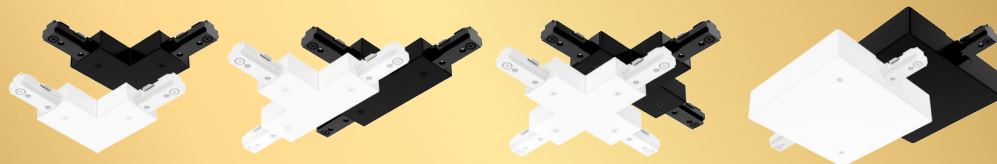

Surface Mount Kit

Pendant Mount Kit
(works with sloped ceilings)

Complete design solutions.

PIVOT is fully compatible with our track system components, which include 3 track lengths in both colors, various joiner configurations, power feeds, and current limiters¹
