

RAB®

Flexible wiring, your way.

PROTEMP prefab temporary lights.

Customize for your job.

Each model has a custom wiring terminal that allows you to wire your own cords to fit your specific needs. When wiring, you can use the provided strain relief connectors or the 1/2" threaded hubs to connect your own fittings, if needed.

Built to be job-site tough.

Construction sites demand durability, and PROTEMP stands up to the toughest conditions:

- UV-resistant polycarbonate housing with rugged metal cage
- Retractable hanging clip and 1/2" threaded hubs
- Operating temp: -40° to 113°F

Versatile power, brilliant output.

The PROTEMP series offers exceptional 360° illumination in two configurations, each with 2 brightness settings: 100% and 50%. Both models feature a cool, 5000K color temperature and 80 CRI for maximized output that helps keep work on track.

Link up, power up.

True universal voltage operation with custom wiring terminals provides unprecedented flexibility. The PROTEMP-100 can link up to 28 units at 277V or 14 units at 120V, while the PROTEMP-150 connects up to 20 units at 277V or 10 units at 120V.
