TRACK22

More than track lighting,
it's total color control.

TRACK22 now with tunable RGBW by Lightcloud Blue.

Control is at your fingertips.

TRACK22 combines elegant design with remarkable versatility. With three sizes, three selectable wattages, and five selectable CCTs in each fixture, you can fine-tune your lighting to create the perfect ambiance for any space.

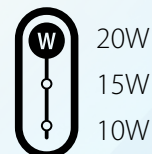

Small

Up to 864lm

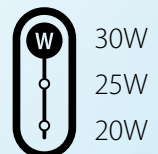

Medium

Up to 2,053lm

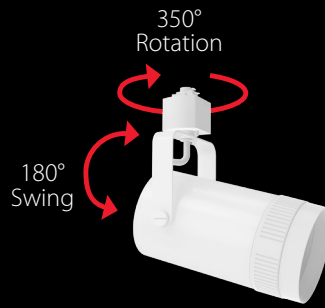

Large

Up to 3,124lm

Your aim is true.

TRACK22 boasts tunable optics that let you adjust beam angles (15° - 55°), giving you simple, adaptable precision. Couple that with 350° rotation and a 180° swing, and your light will go exactly where you need it to.

Get their attention.

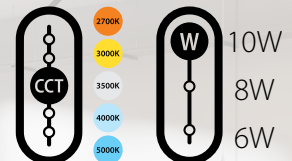

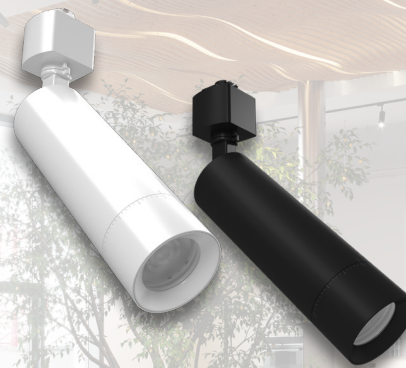

The TRACK22 family operates on standard 120V power with TRIAC dimming capability. It delivers high 90+ CRI for accurate color rendering that makes merchandise and artwork pop, and the polymethyl methacrylate (PMMA) lens is built for durability, superior light transmission, and UV stability.

Same versatility, slimmer form.

Looking for a sleeker option? With the same field-adjustable flexibilities and mounting accessories, the TK22R delivers versatility in a refined, low-profile form factor that elevates any space. The result is this slender evolution with the same versatile performance that defines the rest of the series.

Optics are 24°-60°

A whole new spectrum of possibilities.

TRACK22 RGBW models let you dial in your mood with over 16 million possible colors. From vibrant retail displays to dynamic hospitality environments, tunable RGBW puts total creative control right in your hands.
