

RAB®

TSLED

Always one step ahead...

Treadsafe® field-adjustable stairwell lighting.

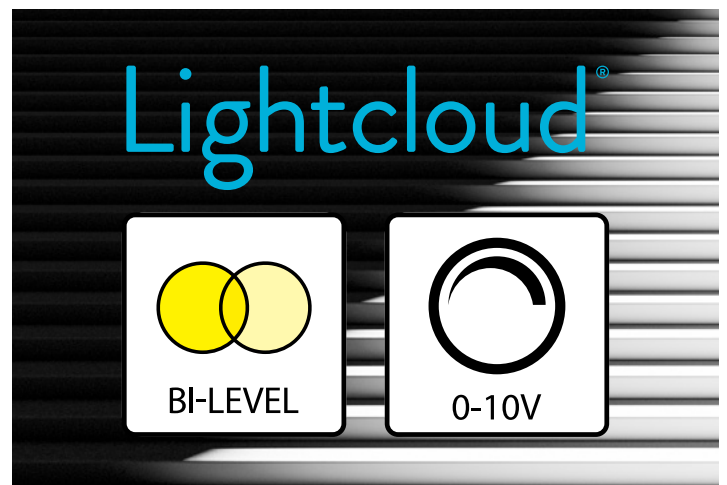

Ultrasonic sensing.

The new generation of Treadsafe lighting is available with an integrated ultrasonic (US) sensor that can be wired to control additional stairwell lighting. Ultrasonic sensing is best suited for stairwell applications where there is often no direct line of sight.

Level up energy savings.

Transform stairwells from energy drains to efficient spaces. Bi-level dimming can quickly be set to meet code, 0-10V dimming will save you even more, and Lightcloud® Blue models let you set high-end trim for maximum savings!

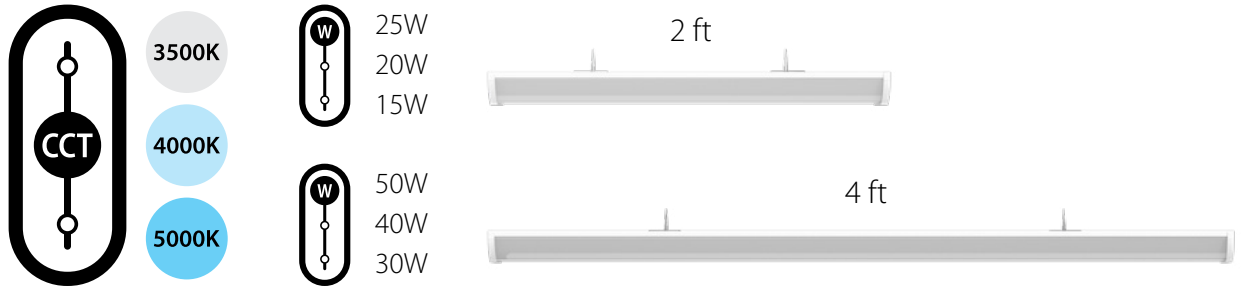

FEATURE PAGE

Adaptable lighting.

The all-new Treadsafe features field-adjustable power and CCT for on-site customization that ensures perfect lighting without having to order multiple SKUs.

We've got your back.

All models are available with battery backup to ensure that stairwells stay safely lit when the building loses power.

Easy installation.

Multiple mounting options provide installation versatility for the Treadsafe. All models come with surface mount hardware and V-hooks for suspended mounts, but a bracket accessory kit is also available for 45° corner mounting.
