TALLPACK

Durable, affordable, sustainable.
Meet the new Tallpack.

Innovation in every detail.

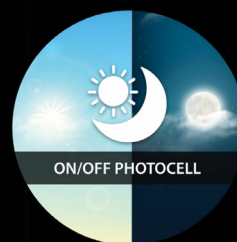

Designed to maintain footprint compatibility with outdated tall packs, the Tallpack redefines versatility with its field-adjustable design. Three selectable wattages and CCTs let you upgrade and fine-tune your lighting, and an on/off photocell provides built-in energy savings.

Sustainable design.

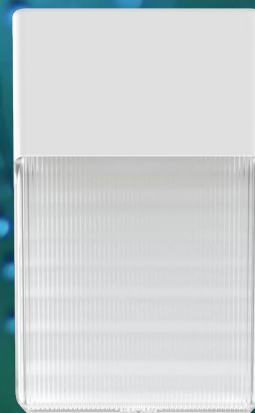

This new Tallpack is far greener than the old fixtures it replaces, with a housing made completely from recycled aluminum and plastic. Top all that with a design that weighs 50% less than its predecessor and is 1" shallower, and you've got one seriously "green" fixture.

Built for real-world performance.

The Tallpack is optimized for use at lower mounting heights on commercial and industrial buildings. Engineered to excel in demanding environments, its rugged construction features IP65 protection against water and dirt, and a shatter-resistant polycarbonate lens guards your investment.

Smart control at your fingertips.

Take command of your lighting with optional, factory-installed Lightcloud or Lightcloud Blue connectivity.
