Maximized versatility.

DISK34 downlights were designed to be a flexible lighting solution for both retrofit and new construction applications, installing into recessed cans* if you've got 'em or standard junction boxes if you don't! Models are offered in 4", 6", and 8" with field-adjustable color temperature.

**8" model does not include accessories to mount into recessed housings.*

Economy that performs.

The frosted lens creates smooth, uniform light that eliminates hot spots, and 90+ CRI ensures accurate color rendering. All models are dimmable to 10% with most standard TRIAC dimmers (120V).

90+ CRI

Dimmable
down to 10%

Anywhere you want it.

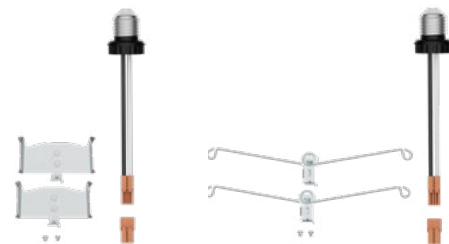

All models are suitable for use in dry, damp and wet locations, making them perfect for both indoor and outdoor use.

Additional accessories.
