L34

Small, smart, sustainable high bay.
The ultra-economy L34.

 5-YEAR LIMITED WARRANTY*

 DLC LISTED

 50K HOURS

 UL CERTIFIED

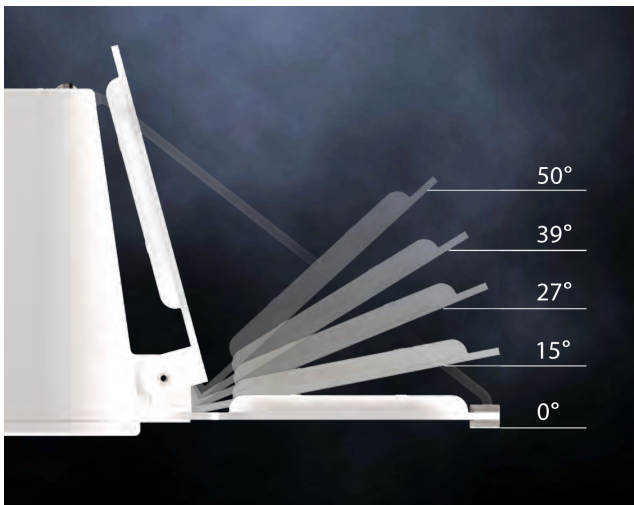

Small design.

The L34 is both compact and lightweight, clocking in at half the overall area of the smallest AEROBAY model and less than half its weight. Its innovative, fold-up design takes up less cargo/storage space than traditional linear high bays and demands far less packaging, making it very eco-friendly.

Smart design.

The adjustable wings on the L34 aren't just for shipping and storage. The unique design includes paracords that lock the lens into 5 different angles, allowing for adjustable light distribution that can turn your high bay into an aisle lighter!

Made from our own leftovers.

Manufactured with up to 30% leftover remelted plastic from our own production process, the L34 contains material that would otherwise be thrown away.

Sustainable packaging.

The L34 uses a far smaller box than standard linear high bays which cuts down use of material, consumes less energy to manufacture, and demands far less fuel to transport, drastically reducing greenhouse gases.

Ordering Matrix

Product Family	Wattage
L34	110 180
	100W 160W

*RAB's warranty is subject to all terms and conditions found at rablighting.com/warranty
