

RAB

Lightcloud Phase Dimmer

Control your lighting with one smart dimmer.

Take control of any environment.

The LC Phase Dimmer puts all the smarts of a lighting control system in spaces with decorative and retrofit fixtures without running new wiring. Maintain the perfect mood with gradual, subtle dimming, easily set schedules and scenes to encourage rest or activity, all while having the ability to disable the Dimmer when needed (*Gateway required*).

Dimming or Switching

Control the attached load, other Controllers, or dim everything together. Patented, intelligent, load-sensing technology that ensures flicker-free dimming. MLV/ELV dimming or switching up to 450W.

Scene Control

Activate unlimited scenes in your system directly from your Phase Dimmer or other Lightcloud devices, such as a Dimmer or Touch.

MOBILE APP

Scheduling

Activate scenes at different times of the day. Timer functions, like automatically turning lights off 15 minutes after turning them on, are easily setup from the Lightcloud app.

Wireless Sensors

Works seamlessly with motion and daylight sensors for maximum energy savings. For complete flexibility, manual controls can temporarily override sensors.

Easy installation

The Phase Dimmer fits a standard junction box and can be wall or ceiling mounted.

Control from anywhere

Set up and control from your phone, tablet or computer without ever stepping foot onsite.

Ordering information

Select from the following options to build your Phase Dimmer.
