# SmartShift™

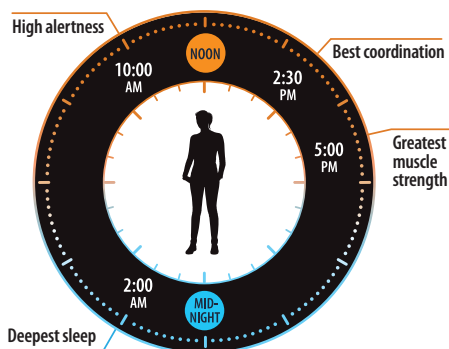

The most advanced circadian lighting system available, keeping your body—and your mind—in mind.

## Introducing SmartShift

Before there was lighting, there was sunlight. Our internal clocks moved in harmony with the sun. But modern life disrupted our circadian systems and knocked them out of sync. The more time we spent indoors under artificial light, the more our natural rhythms were impacted.

Enter SmartShift from RAB Lighting — a circadian lighting system that comes pre-programmed to match the natural patterns of daylight and helps our bodies get back in sync with the sun.

## Lighting that can bring you back in sync.

SmartShift is the first lighting technology that can promote better sleep, health and happiness. Once installed alongside a Lightcloud control system, it automatically tunes the color and intensity of indoor lights throughout the day, syncing your body with the natural cycles of daylight.

POWERED BY  
LIGHTCLOUD®

PRE-PROGRAMMED  
CIRCADIAN SCHEDULES\*

CHANGE COLOR  
TEMPERATURE

CONTROL WITH  
MOBILE APP

## Powered by Lightcloud.

Control your SmartShift-enabled fixtures from your mobile device. Create your own scenes, moods and schedules, or temporarily override automated circadian controls for precision customization.

Manage an entire site or multiple sites from a web-based dashboard, with no servers to setup or maintain. Configure right down to the individual fixture—or we could even manage it for you!

## The right kind of light.

With one click, SmartShift-enabled lighting fixtures on a Lightcloud system will set themselves to your time zone and begin adjusting your light level and color temperature to match the natural pattern

of the sun... a soft glow in the morning, energizing light during the day, and a warm hue in the evening. SmartShift technology is a huge step forward in human well-being.

## EZPAN® available with SmartShift™

The EZPAN family of edge-lit panels is the first of many RAB products that will be offered with integrated SmartShift technology. Available in 2x2, 1x4 and 2x4 form factors, these ultra-low-profile panels are an ideal solution for adding circadian lighting to offices, education, hospitality and healthcare facilities.

\* The SmartShift circadian schedule is based on IES recommendations.
