

RAB®

STRINGER Lights

Save energy on the job.

IP65 rating for protection against dust and water

Competitor's old version

Out with the old, in with the new.

The STRINGER replaces the outdated, incandescent string lights often found on large construction sites with energy-efficient, low-cost LED. Available in both 50ft (5 light heads, 50W) and 100ft (10 light heads, 100W) strands, the STRINGER can be daisy chained up to a maximum of 300ft/300W.

Cover a lot of ground.

Offered with bright 5000K light, the STRINGER delivers omnidirectional, 360° coverage on a job site and the 300W daisy chaining capacity allows for 300 feet of coverage. Its frosted polycarbonate lens provides smooth light and minimizes glare to ensure a well-lit work area.

Built to last.

The STRINGER's high-impact, industrial-grade design is meant to stand up to demanding environments. The lamp, guard, and hanging hook are all integrated, and the plug receptacle comes with a weatherproof cover. The STRINGER's IP65 rating makes it dust tight and provides protection against water jets.

Economy that performs.

At RAB, economy products always overdeliver. With a lifespan of 50,000 hours, these temporary lights can last 11+ years with 12 hours of daily use. To make sure you get the most bang for your buck, the STRINGER is covered by RAB's industry-leading, 5-year, no-compromise warranty.
