

Field-adjustable HID wall pack replacements.

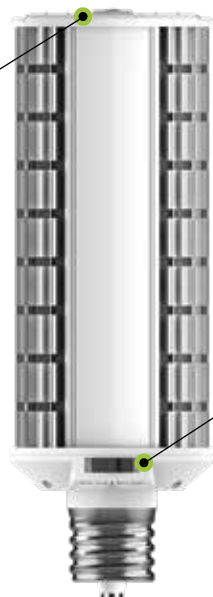

Selectable power and CCT provide unmatched flexibility.

Less inventory, less guessing.
1 Field-adjustable lamp does the work of 9!

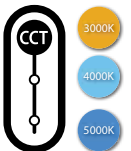

Power Selector.

Selectable wattage allows you to toggle between three different lumen outputs. Adjusting illumination can allow for installation flexibility, and gives you the option to maximize energy savings or light output.

Tunable White.

This wall pack lamp is field adjustable, allowing you to choose from three color temperatures with the flick of a switch, giving you the flexibility to customize an area's appearance with a single lamp!

Keeping it cool.

LED wall pack lamps can take the heat by using active cooling technology. Their design allows air to pass through and cool things down without the use of an on-board fan that can fail prematurely.

Direct light where you need it.

Each LED wall pack lamp has a rotatable base that allows you to direct light where you need it. These lamps also come with a support stand in the box that protects against strain on the socket.

It can take the heat.

All wall pack lamps are designed to handle the heat of closed spaces, so they can be used with confidence in both open and enclosed fixtures.

But wait, there's more.

Universal voltage models are ideal for commercial applications. Available in 100W, 150W, 200W, and 250W metal halide replacements with only EX39 base. For any retrofit application, RAB has you covered.
